// ACCE—"Vector: PWAZIVY, Purified genomic DNA from M. musculus C57BL/6J (male) was obtained from the Jackson Laboratory Mouse DNA Resource (http://www.jax.org/resources/documents/dnares/). The DNA was hydrodynamically sheared by repeated passage through a 0.005 inch orifice at constant velocity. The sheared DNA was blunt end repaired with T4 DNA polymerase and T4 polynucleotide kinase. Adaptor oligonucleotides were ligated to the blunt ends in high molar excess. The adaptored DNA was purified and size-selected for a 9.5 to 10.5 kb range using preparative agarose gel electrophoresis. Vector DNA was prepared from a derivative of pwD42 (qi|4732114qb|AR129072.1), a copy-number inducible derivative of plasmid R1. The vector was ligated purified. The sheared, adaptored mouse DNA was annealed to adaptored vector DNA, and transformed into

/dev_stage="adult"
/note="organ: liver: Vector: Lambda ZAP Express; Site_1:
ECGR1; Site_2: Xhol; An Atlantic salmon liver cDNA library
was constructed using the Lambda Zap Express/Gigapack
cloning kit (Stratagene cloning systems). CDNA synthesis
was carried out using an oligo (dT) primer for the
reverse transcription of Sug of mRNA and the library was
constructed by directional cloning EcoR1-Xhol based on
manufacturers instructions. An insert:vector ligation
ratio of 1:5 was chosen as most optimum . The lambda
library was packaged with Gigapack III gold packaging
extracts and plated on the E. coli cell line XL1-Blue
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Entanyota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Actinopterygii; Neopterygii; Teleostei; Euteleostei; Euteleostei; Protacanthopterygii; Salmoniformes; Salmonidae; Salmo.

Patent No. 6200749
GENERAL INFORMATION:
APPLICART: Shiloh, Yosef
TITLE OF INVENTION: MUTATED FORMS OF THE ATAXIA-TELANGIECTASIA GENE AND METHOD TO
TITLE OF INVENTION: SCREEN FOR A PARTIAL A-T PHENOTYPE
FILE REFERENCE: 229000033
CURRENT APPLICATION NUMBER: US/08/642,274D
CURRENT FILING DATE: 1996-05-03
NUMBER OF SEQ ID NOS: 220
                                                                                                                                                                                                                                                                                                                                                                           APPLICANT: Cole, Stewart

                                                                                                                                       Sequence 2325, Application US/09867701

Patent No. US2002013237A1

GENERAL INFORMATION:
APPLICANT: Aplate, Paul A.
APPLICANT: Jones, Robert
ATTLE OF INVENTION: COMPOSITIONS AND METHODS FOR THE THERAPY
TITLE OF INVENTION: AND DIAGNOSIS OF OVARIAN CANCER
TITLE OF INVENTION: AND DIAGNOSIS OF OVARIAN CANCER
CURRENT APPLICATION NUMBER: US/09/867,701
CURRENT FILING DATE: 2001-05-29
NUMBER OF SEQ ID NOS: 10912
SOFTWARE: FastSEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Length 126;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Length 122;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence 4131, Application US/09974300

Patent No. US20020146721A1

GENERAL INFORMATION:

APPLICANT: Berka. Randy M.

APPLICANT: Clausen, ID Groth

TITLE OF INVENTION: Methods For Monitoring Multiple Gene

TITLE OF INVENTION: Expression

FILE REFERENCE: 10085.500-US

CURRENT APPLICATION UNMBER: US/09/974,300

CURRENT FILING DATE: 2001-10-05

PRIOR APPLICATION NUMBER: 09/680,598

PRIOR PELICATION NUMBER: 60/279,526

PRIOR PELICATION NUMBER: 60/279,526

PRIOR PELICATION NUMBER: 60/279,526
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ore 17; DB 10;

Requence 4734, Application US/09983965

Patent No. US20020137160A1

GENERAL INFORMATION:
APPLICANT: Tao, Nengbing
APPLICANT: Tao, Nengbing
APPLICANT: Byatt, John C.
APPLICANT: Mathialagan, Nagappan
TITLE OF INVENTION: MUSCLEIC ACID AND OTHER MOLECULES ASSOCIATED WITH LACTATION AND FILE OF INVENTION: MUSCLE AND FAT DEPOSITION
FILE OF INVENTION: MUSCLE: 2001-10-26
CURRENT FILING DATE: 2001-10-26
PRIOR FILING DATE: 1999-12-15
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  DB 10; Length 336; 91;
